

Ekahau Insights

Wi-Fi performance analytics with automatic issue identification and step-by-step network optimizer.

Automated, Fast & Easy Wi-Fi Performance Analytics

Ekahau Insights is a professional-grade Wi-Fi analytics tool that gives you instant visibility into Wi-Fi network performance and design quality across all your sites. This interactive dashboard provides you with actionable intelligence and easy, step-by-step instruction to improve the Wi-Fi experience for your users and minimize downtime at every site.

Optimize Your Network in Seconds with Ekahau Optimizer

Just go for a walk with Sidekick 2 to uncover actionable insights that you can deploy today. Each recommended improvement walks you through an overview of the configuration and provides a simple, step-by-step guide to optimize your network.

Seamless Guest Sharing with Heatmap Cloud Viewer

With Insights, sharing project heatmaps with non-Ekahau users is easy. The built-in heatmap cloud viewer enables anyone with access to a guest link to see heatmap visualizations right from their web browser. No licenses or logins required. Share predictive designs and survey results with team members or stakeholders without having to generate custom reports.

Simplified Project File Management & Organization

Whether you're the owner of a global, multi-site network or you're a systems integrator managing multiple networks for your customers, Insights' tagging capability simplifies project file management by making it easy to organize, search, filter and find what you're looking for.

Expert Network Insight with Every Health Check

Ekahau Insights gives you a real-world view of Wi-Fi quality and performance at the client level, giving you a clear picture of your network health and making it easy to keep up with your ever-changing RF environment so you can stay ahead of any changes that are impacting your Wi-Fi performance.

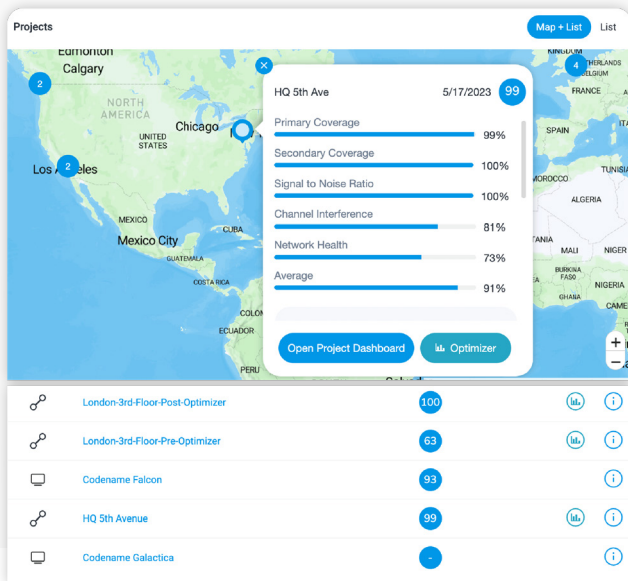

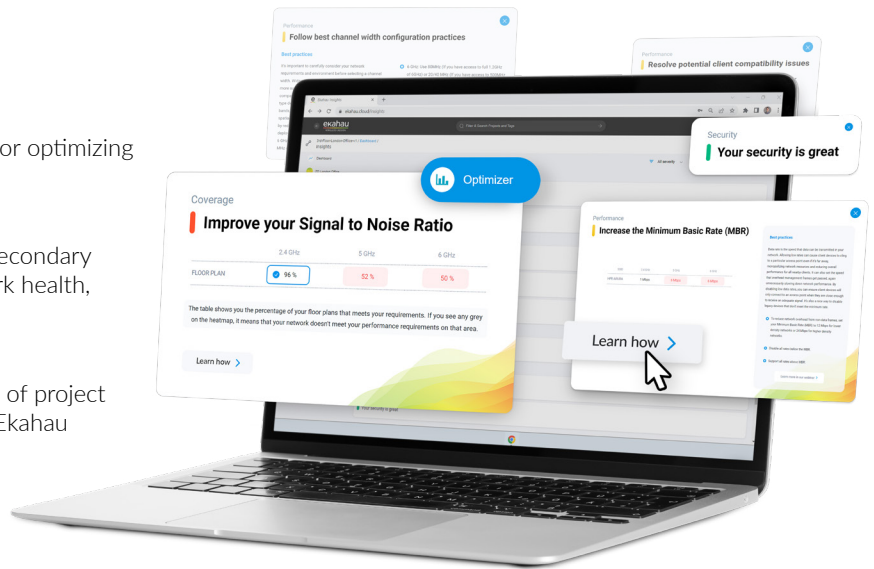

Key Features

- ✔ Automatic network evaluation with actionable, step-by-step guides for improving your Wi-Fi
- ✔ Full visibility into Wi-Fi performance, network inventory and survey actions across all the networks you design, survey, optimize, and troubleshoot with Ekahau
- ✔ Built-in analysis of network coverage, signal to noise ratio, channel interference and network health against your requirements for every site
- ✔ Automatic issue identification and drill down with heatmap cloud viewer
- ✔ Enhanced project sharing with user rights management, including the ability to transfer project ownership
- ✔ Share guest links to project performance analytics and online heatmaps and collaborate for free without an Ekahau license
- ✔ Organize and add context to project files with searchable and filterable tags

Project-Specific Insights

- Ekahau Optimizer**
 Get automated and easy-to-understand instructions for optimizing your network based on Sidekick 2 measured data.
- Heatmap Viewer**
 Review heatmaps and visualizations for primary and secondary signal strength, capacity, channel interference, network health, network issues, and signal to noise ratio.
- Project and Results Sharing**
 Manage project sharing rights, transfer the ownership of project files, and share private URL links to users without an Ekahau license.
- Project Tagging**
 Use tags to easily organize and add context to your projects such as client names, site types, workflow state and more.

Global Network Insights

- Search and Sort Projects**
 Filter and find projects by site location, tags, and last survey activity date.
- Rank Projects by Network Health**
 Get an instant breakdown of Wi-Fi performance and filter through a selection of network rating criteria.
- Network Inventory Overview**
 Get a complete breakdown of APs in use, their technology generations and where they are located.
- Survey Events Statistics**
 Access a full list of survey events, time invested and distances covered to ensure you have regular surveys across all sites.

System & Solution Requirements

- Latest version of Chrome, Firefox, Safari, or Edge web browsers. Chrome recommended for best experience.
- Ekahau Connect Subscription
- Ekahau Sidekick 2 recommended
